

# Package Update Guide

*Unbabel for Service Cloud*

## Introduction

Unbabel is seamlessly integrated into Salesforce Service Cloud, delivering human-quality translations at speed.

In this document, we describe how you can update the Unbabel Apps for the latest versions.

## Latest Packages

Latest package versions released.

### Unbabel Connector

#### Installation URL

[your Salesforce Org URL]/[packaging/installPackage.apexp?p0=04t1n000002Guac](#)

### Unbabel for Service Cloud

#### Installation URL

[your Salesforce Org URL]/[packaging/installPackage.apexp?p0=04t1v000002GzHM](#)

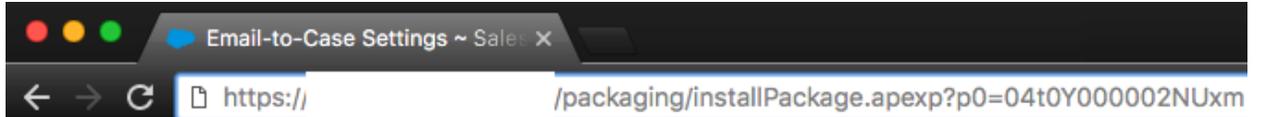

## Steps

Please install the Apps by the correct order:

- **Unbabel Connector v1.53**
- **Unbabel Service Cloud v1.62**

For each package:

1. Copy the URL into a browser where you have already login into the target Salesforce Org. Press the "enter" key.

2. After that select "Install for Admin Only", or the option that best suits your organization needs and perform the necessary steps to update the managed package.
3. As the last step please save the configuration in order to remain with the previous values.

## Release Notes

### Update automatic translation for case and last email on case ownership change

The automatic translation triggers when a Case ownership changes. The steps are the following:

1. A new Case assigned from a non Unbabel Queue/Agent to an unbabel Queue/Agent.

If the Case field **Unbabel Language** or **Unbabel Translated Description** is empty:

2. A translation for the Case description will be automatically requested.
3. As soon as the translation arrives, it would be added to the Unbabel Translated Description field.
4. A translation for the last Email Message (if any) will be automatically requested.
5. As soon as the translation is delivered it would be posted on the Case feed as a new Email Message.

### Configurations

Make sure that on the **Unbabel SC Configuration Page** you have enabled:

▼ Translation Configuration

Automatic translations (emails)

Automatic translation (Cases) ⓘ

In this way the automatic translations will be enabled for all Agents with the Unbabel SC Permission Set.

**⚠ NOTE: We recommend that you test this feature in a test/uat environment before enabling it in production. A validation/trigger on the Case may impact or process when assigning a new owner.**
