

# Package Release

*Unbabel for Service Cloud*

## Introduction

Unbabel is seamlessly integrated into Salesforce Service Cloud, delivering human-quality translations at speed.

In this document, we describe how you can update the Unbabel Apps for the latest versions.

## Latest Packages

Latest package versions released.

### Unbabel Connector

#### Installation URL

[your Salesforce Org URL]/[packaging/installPackage.apexp?p0=04t1n000002Gudv](#)

### Unbabel for Service Cloud

#### Installation URL

[your Salesforce Org URL]/[packaging/installPackage.apexp?p0=04t1v000002Gzu4](#)

## Steps

Please install the Apps by the correct order:

- **Unbabel Connector v1.55**
- **Unbabel Service Cloud v1.66**

For each package:

1. Copy the URL into a browser where you have already login into the target Salesforce Org. Press the "enter" key.

2. After that select "Install for Admin Only", or the option that best suits your organization needs and perform the necessary steps to update the managed package.
3. As the last step please save the configuration in order to remain with the previous values.

## Release Notes

### Update automatic population of from address based on the standard Salesforce logic

The **From** address selection of the Email Translation Component was updated in order to automatically select the support address when possible. We fixed the behavior for routing addresses due to a limitation on how an Agent is able to access them. All the support addresses in use must be mapped first on the Unbabel SC Configuration menu.
