

# Unbabel for Live Agent

*Update Packages for the latest version*

## Introduction

Unbabel integrates with Salesforce Live Agent (Chat), delivering human-quality translations at speed.

In this document, we will describe how you can update the Unbabel Apps to their latest versions.

## Release Notes

- Fix the issue when the translation request is being delivered with more than the allowed size of 6000 characters
- Support setting the visitor's language based on an initial chatbot interaction

## Steps

Update both the managed packages below.

### 1. Unbabel Connector

Base package of our integrations. You may already be on the latest version.

#### Installation URL

[your Salesforce Org URL]/[packaging/installPackage.apexp?p0=04t1n000002GufS](#)

### 2. Unbabel Live Agent

Extension package for the chat integration.

#### Installation URL

[your Salesforce Org URL]/[packaging/installPackage.apexp?p0=04t1n000001pHnOAAU](#)

Please install the Apps in the correct order:

- 1. Unbabel Connector v1.56**
- 2. Unbabel Live Agent v1.34**

For each package:

1. Paste the URL into a browser that is already logged into the target Salesforce Org. Press the "enter" key.

2. Select "Install for Admin Only", or the option that best suits your organization needs and perform the necessary steps to update the managed package.
3. Save the configuration
